

HOTARU

HOTARU is the world's first multi-spectral (Thermal, Infra Red) safety strobe beacon suitable for rescue teams, hunters, extreme sports and law enforcement (IFF).
Smaller, lighter, powerful and affordable.

OPERATION MODE

Simultaneous Multi-Spectral strobe. Omni directional.
Repetition rate: 1 Hz.

APPLICATIONS

Active strobe applications for safety in hunting, hiking, trekking and rescue forces.

FORM FACTOR

The small size and light weight makes it ideal for head mount, torso, tripod or backpack.
